| SANWA SERIES

316 STAINLESS STEEL
SEALLESS
CORROSION RESISTANT
LEAK FREE

IWAKI 
 **SANWA PUMP**

Iwaki Sanwa Pumps feature 316 Stainless Steel materials in a magnetic drive design that provides leakfree operation. With flows to 340 GPM, Iwaki Sanwa has the right pump for every application.

MMP Series

The MMP/MML/MMH Series is ideal for low flow applications where the pump size is a concern. The MMP/MML/MMH features high strength magnets, SIC-D bearings, machined rear casing and a single gasket seal.

TEMPERATURE RANGE

-22°F – + 302°F (-30°C – + 150°C)

MP Series

The MP/MH/ML Series

is the perfect combination of dependability and affordability. With flow rates to 340 GPM and rugged 316 stainless steel construction, the MP/MH/ML Series meets most sub-ANSI applications at a very affordable price.

TEMPERATURE RANGE

-22°F – + 302°F (-30°C – + 150°C)

High Temperature

TEMPERATURE RANGE

+25°F – +536°F (-4°C – +280°C)

MH Series

MMH Series

- Fin type frame adapter dissipates heat away from pump
- Rare earth Samarium Cobalt magnets
- High temperature gasket material

Low Temperature

TEMPERATURE RANGE

-112°F – +302°F (-80°C – +150°C)

ML Series

MML Series

- Nitrogen purge port is provided to prevent moisture from freezing in the frame adapter
- Rare earth Neodymium magnets are used
- Low temperature gasket material

Pump Specifications

Non-Metallic Pumps

Corrosion resistant EFTE Teflon® Internals or virgin PFA suitable for temperatures to 302° F (150° C) in a magnetic drive sealless package.

MXM Series

MDM Series

Accessories

Power Monitor

Capable of detecting both over-load and under-load conditions, the monitor offers protection from off-design conditions such as dry running, dead head, end of curve, cavitation and excessive bearing wear.

Non-Metallic Baseplates

Corrosion-resistant Basetek polymer concrete non-metallic bases. Bases use stainless steel inserts as a standard and are available with optional grout holes, and drip pan.
